ASX ANNOUNCEMENT

Saferoads secures first order of its new HV2™ temporary barrier system

The directors of Saferoads Holdings Limited (**ASX: SRH**) are pleased to announce that the Company has secured its first order of its new HV2™ temporary barrier system to a major equipment hire company in New Zealand, for delivery in July.

Commenting on the order, CEO Mr. Darren Hotchkin said, *"This initial sale of a new product is a critical milestone for us in introducing the first free-standing TL-4 MASH tested temporary barrier system in the world."*

"This is the start of the commercialisation stage of this new product, which is progressing well with regulatory approvals in five US states and also, more recently, the province of Ontario in Canada."

We are anticipating further Australian approvals towards the end of the calendar year.

ABOUT THE HV2™ TEMPORARY BARRIER SYSTEM

The HV2™ Barrier is an Australian designed free-standing, temporary longitudinal barrier system successfully crash tested to MASH TL-4. The patented hybrid technology and patented connection system allow Saferoads' HV2™ Safety Barrier to offer high containment and low deflection, while remaining economical to transport and deploy with no time-consuming anchoring required.
